PROFILE

I am a web technologist with over 5 years of experience designing and developing for the web. I have worked in three (Front-end developer, UX/UI Designer, and Web Developer) different roles in the web industry, and have learnt and understood what it takes to design and develop web products that users want (and will use).

The drive to understand what the perfect web product look/feels like has pushed me to go back to working more in the ideation and conceptualization stage of product development, which has helped me contribute into building simple/usable web products that users fall in love with.

PROFESSIONAL HISTORY

September 2016 - Present

Web Developer, VENTRA MEDIA GROUP

Lagos, Nigeria

Ventra Media Group is a full service digital agency and strategic partner for brands in Africa like DSTV, Guardian Nigeria, Ndani.TV, NotJustOk, and Nigerian Breweries.

We immerse ourselves in client's brand, get to know their audiences and understand their business needs and metrics. Our holistic strategies, campaigns, and collaborative approach ensure that our partners and clients get a good return on their investment.

ROLE

At Ventra Media Group, I am a lead web product developer for the Guardian Nigeria platform (<http://guardian.ng>, <http://tv.guardian.ng> and <http://life.guardian.ng>), which includes the development of cross-platform online newspaper sites, video platforms and social media integrations. My role requires:

- Collaborating with visual designers to launch to ensure feasibility of development features.
- Writing software solutions using both front-end and back-end web technologies like HTML5, CSS(SCSS), JavaScript (Vanilla, jQuery, and Backbone), PHP and WordPress Core Development.
- Learning new media publishing technologies and implementing them on the Guardian Nigeria platform.
- Working with External/third party APIs to create development solutions.
- Developing WordPress plugins.
- Building WordPress themes.

PROFESSIONAL HISTORY (CONT'D)

October 2015 - August 2016

Senior Front-end Developer / UX Designer, CKDIGITAL

Lagos, Nigeria

CKDigital is a Lagos based web design, web development, and digital marketing firm creating clean websites, and effective digital marketing campaigns that inspire customers, extend capabilities and advance businesses.

ROLE

My role at while I was at CKDigital involved ensuring that every web product we shipped out and handed over to our clients met some design and development heuristics which I have set as standards for a good web product. My role also involved:

- Leading the front-end development team and helped define the technological process and strategy for projects.
- Interviewing and Evaluating potential front-end development candidates.
- Assessing of the team's skills to distribute appropriate workloads.
- Coordinating with other teams to establish cross-departmental continuity.
- Working with project team members to ship responsive, aesthetically-pleasing and engaging user experiences for the web.
- Teaching new web technologies to the front-end development team.
- Setting up and coordinating scrum meeting for the project team.
- Carrying out usability testing for finished products.
- Designing web products.

February 2015 - September 2015

Front-end Developer, CKDIGITAL

Lagos, Nigeria

ROLE

- Develop responsive/adaptive websites
- Convert Design files to webpages
- Create interactive animations with CSS3 Keyframes
- Collaborate with user interface designers

PROFESSIONAL HISTORY (CONT'D)

May 2013 - January 2015

Freelance Web designer, FUNBUTFRIEND.LY

Remote, Anywhere

Starting out as a web designer required exposing myself to a lot of projects. I created a company called funbutfriend.ly which allowed me learn better and instill confidence in handling professional web design/development projects. I worked with some clients (both home and abroad) to help bring their ideas to life.
